

a1

20. A system-on-panel liquid crystal display according to claim 19, wherein the pixel array active layer further includes polysilicon or single crystalline silicon.

Subst.  
C4

21. A system-on-panel liquid crystal display, comprising:  
a substrate including at least first, second and third regions;  
a pixel array formed on the substrate at the first region, the pixel array having an active layer including amorphous silicon;  
a driver formed on the substrate at the second region, the driver having an active layer including polysilicon or single crystalline silicon; and  
a control unit formed on the substrate at the third region, wherein the control unit includes switching devices having at least one active layer formed of single crystalline silicon.

21

22. A system-on-panel liquid crystal display according to claim 21, wherein the pixel array active layer further includes polysilicon or single crystalline silicon.--

**REMARKS**

Claims 1-22 are pending in the subject application. Claims 1-18 stand rejected. By this Amendment, Applicant adds new claims 19-22. Reexamination and reconsideration of the application, as amended, are respectfully requested.

The November 3, 2000 Office Action rejected claims 1-18 under 35 U.S.C. §112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In particular, the Examiner
